

AKARI software

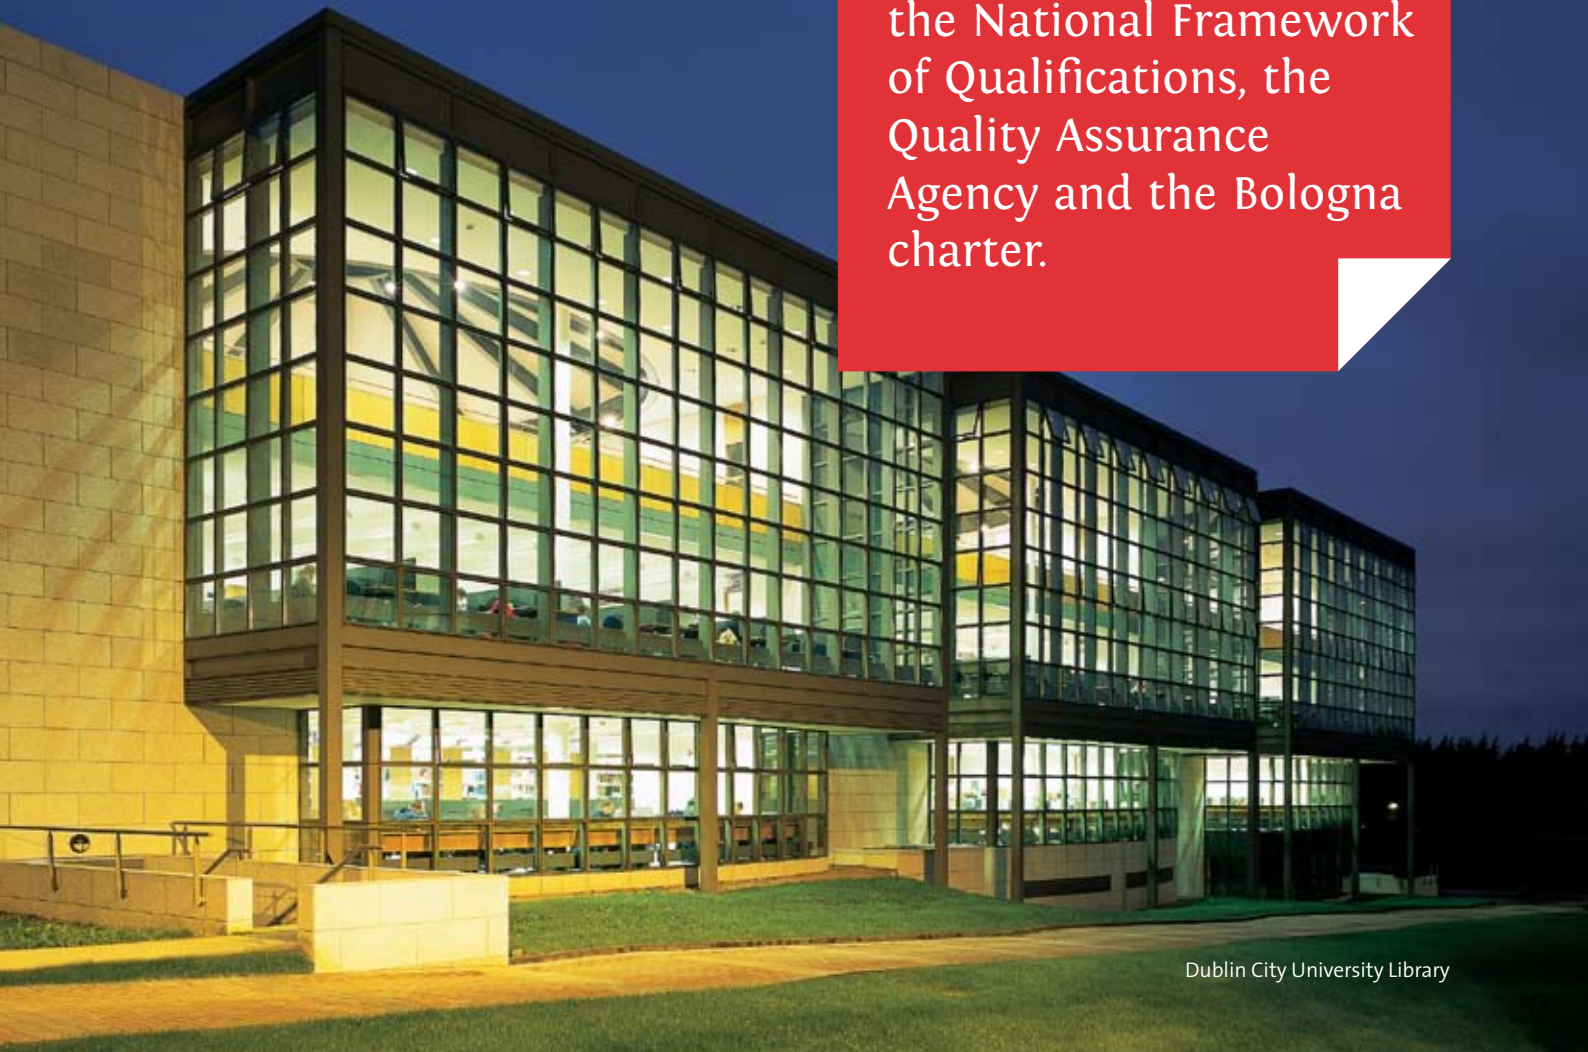

Transforming the Curriculum Lifecycle

Akari curriculum management solutions simply improve administrative productivity by reducing error rates in the management of all aspects of module and programme development while improving quality standards.

Akari Software also provides valuable course data and business intelligence that can integrate with Student Record Systems, Exam Management Systems, Timetabling Systems, Virtual Learning Environments and Content Management Solutions amongst others.

All Akari solutions have been developed in conjunction with Higher Education Institutions in both Ireland and the UK and are fully compliant with the National Framework of Qualifications, the Quality Assurance Agency and the Bologna charter.

The curriculum is the lifeblood of all Higher Education Institutions. It determines the effectiveness of every institutions offering, from design and development of courses through to their delivery, validation, resource allocation and timetabling.

The curriculum is the lifeblood of all Higher Education Institutions. It determines the effectiveness of every institutions offering, from design and development of courses through to their delivery, validation, resource allocation and timetabling. Being able to manage the curriculum is an all-important factor in determining how effectively and efficiently an institution performs and delivers value to its students and other stakeholders.

Akari Software is all about recognising the importance of managing the curriculum efficiently and ensuring its place is at the centre of the academic institution.

Akari Software provides proven web based curriculum management solutions that ensure Higher Education Institutions can better manage the development, editing, approval, capture, publication and delivery of all aspects of module and programme development.

Akari Software provides proven web based curriculum management solutions that ensure Higher Education Institutions can better manage the development, editing, approval, capture, publication and delivery of all aspects of module and programme development.

Solution Overview

Akari Software is installed in Higher Education institutions since 2006 where it is delivering proven and ongoing improvements in all aspects of curriculum management and development.
